

BAB 7

KESIMPULAN DAN SARAN

7.1 Kesimpulan

Pada penelitian ini tidak terdapat hubungan bermakna antara tingkat spiritualitas dan tingkat kualitas hidup. Hasil ini tidak mendukung teori dan hasil penelitian terdahulu mengenai hubungan antara kedua variabel. Keadaan ini perlu ditelusuri lebih lanjut untuk meningkatkan kesejahteraan hidup penderita kanker karena tingkat kualitas hidup pada pasien kanker merupakan parameter keberhasilan pengobatan paliatif yang di jalani.

7.2 Saran

Untuk penelitian selanjutnya, disarankan :

1. Melakukan survey awal yang lebih teliti agar mengetahui karakteristik dari responden yang

diambil dan jumlah yang dapat diambil dari tempat yang ingin dijadikan tempat pengambilan sampel.

2. Jika ingin melakukan penelitian bersama, sesuaikan dengan jumlah pertanyaan pada kuesioner agar tidak membuat responden jenuh dalam menjawab pertanyaan.
3. Dilakukan penilaian terhadap lamanya responden mengalami kanker serviks, karena itu bisa menjadi salah satu faktor perancu terhadap hasil yang diterima.
