PEMANFAATAN KOLEKSI DAN SUMBER INFORMASI PERPUSTAKAAN

Oleh : Riana Ika Susanti
Staff Layanan Pemakai Perpustakaan UKWMS

TIPE PENELITIAN

- ❖ Penelitian Informasi *Konvensional*
contoh: kartu katalog, kamus, ensiklopedi, bibliografi, *indeks*, dan sebagainya.
- ❖ Penelitian Informasi *Digital*
contoh: *OPAC (Online Public Access Catalog)*, *Search Engine*, *Database Online*, Jurnal Elektronik, *Reference Online*, dan informasi lain yang tersedia secara elektronik/*digital*.

EVALUASI SUMBER-SUMBER INFORMASI

Domain yang sering digunakan :

1. **org**, merupakan situs website organisasi nirlaba (misal <https://www.prakerja.org/>)
2. **com & co.id**, merupakan situs website bisnis dan komersial (<https://www.jawapos.com>)
3. **edu**, merupakan situs website lembaga pendidikan (<https://www.harvard.edu>)
4. **ac.id**, merupakan situs website lembaga perguruan tinggi (<https://ukwms.ac.id/>)
5. **net**, merupakan situs website organisasi / penyedia jasa jaringan (<https://www.biznethome.net/>)
6. **gov & go.id**, merupakan situs website organisasi / lembaga pemerintah (<https://www.perpusnas.go.id/>)

PENELUSURAN INFORMASI BERHASIL, JIKA....

- ❖ Kejelasan dalam identifikasi kebutuhan informasi
- ❖ Ketepatan menggunakan berbagai alat penelusuran
- ❖ Kecermatan menggunakan prosedur penelusuran
- ❖ Kecermatan evaluasi hasil penelusuran informasi.
- ❖ Ketekunan menggunakan berbagai cara dan teknik penelusuran.

JENIS SUMBER ILMIAH *ONLINE*

- ✓ **Berbayar (Closed Access)**
- ✓ **Gratis (Open Access)**

KOMUNIKATIF

Komunikatif is issued by Fakultas Ilmu Komunikasi Universitas Katolik Widya Mandala Surabaya since 2012. Komunikatif is a peer-reviewed journal. Komunikatif publishes an article from selected topics in communication studies; those are media studies, public relations, and human communication. Articles issued by Komunikatif are conceptual articles and research articles. Komunikatif aims at publishing research and scientific thinking regarding the development of communication studies and contemporary social phenomena. Komunikatif also wishes to become an eligible reference for students and/or academia, especially in the communication field. Komunikatif is issued twice a year (July and December). Komunikatif clarifies ethical behavior for all parties involved, including authors, editor-in-chief, Editorial Board, reviewers, and publisher. Komunikatif provides free access for the online version to support knowledge exchange globally.

Komunikatif: Jurnal Ilmiah Komunikasi, ISSN 2301-6558 (printed), ISSN 2597-6699 (online), is incorporate with Indonesian Communication Sciences Publisher Journal Association: Asosiasi Penerbit Jurnal Ilmu Komunikasi Indonesia (APJIKI).

Komunikatif: Jurnal Ilmiah Komunikasi is accredited by Kemenristekdikti RI (SINTA 3) based on SK No. 28/E/KPT/2019.

In each edition, Komunikatif: Jurnal Ilmiah Komunikasi has received an article openly. The article will be reviewed by internal and external editors, and reviewers who have related expertise.

Pangkalan Gojek : Ruang Produk Kapitalisme Digital

Holy Rafika Dhona, Gigih Mahatattwo

Abstract

Gojek driver base is a new social space formed by the tension between the development of communication technology and Indonesian drivers' work practices. It also creates further implications, namely the new meaning of a different space and new working model. Unfortunately, the communication dynamic in this event has not received much attention from communication scholars in Indonesia. Using the ethnography of space, this study found three things. First, Gojek drivers ambivalently interpret their base as 'office', but they did not consider their actions at the base as a work activity. This mystifies Gojek free drivers as 'casual workers'. Second, the absence of bases in the representation of space in the Gojek application forces driver to producing these bases independently. The cellular navigation, which gave rise to egocentric cartographic readings, became Gojek's instrument to intervene in a concrete space by making the driver the anchor of the production of a new social space. Third, the drivers then live the base with the image of brotherhood between the members of the base. They even become workers who can regulate themselves, which is in line with the logic of efficiency by digital capitalism such as Gojek.

Conferences Widya Mandala Surabaya Catholic University

INTERNATIONAL FOOD CONFERENCE

International Food Conference (IFC) is a conference carried on once every five years since 2011. Organized by Department of Food Technology, Widya Mandala Surabaya Catholic University, Indonesia.

IFC 2021 will be held in November 3rd, 2021. Unfortunately, due to COVID 19 pandemic, this year IFC will be an online conference using ZOOM as an online platform.

The topic of this conference is "**Innovation of Food in the New Normal Era**" which will emphasise the role of food as one essential contributors to the combat against COVID 19. The scope of the conference are grouped into categories such as Food Availability, Food Process and Product development, Fermented Food, and Functional Food and Gut Health, and other related food research.

For registration, submission, and further information, please follow the link below.

ABSTRACT

Background. The importance of organic farming has increased through the years to promote food security allied with minimal harm to the ecosystem. Besides the environmental benefits, a recurring problem associated with organic management is the unsatisfactory yield. A possible solution may rely on the soil microbiome, which presents a crucial role in the soil system. Here, we aimed to evaluate the soil bacterial community structure and composition under organic and conventional farming, considering the tropical climate and tropical soil.

Methodology. Our organic management treatments were composed by composted poultry manure and green manure with Bokashi. Both organic treatments were based on low nitrogen inputs. We evaluated the soil bacterial community composition by high-throughput sequencing of 16S rRNA genes, soil fertility, and soil enzyme activity in two organic farming systems, one conventional and the last transitional from conventional to organic.

Results. We observed that both organic systems evaluated in this study, have higher yield than the conventional treatment, even in a year with drought conditions. These yield results are highly correlated with changes in soil chemical properties and enzymatic activity. The attributes pH, Ca, P, alkaline phosphatase, and β -glucosidase activity are positively correlated with organic systems, while K and Al are correlated with conventional treatment. Also, our results show in the organic systems the changes in the soil bacteria community, being phyla *Acidobacteria*, *Firmicutes*, *Nitrospirae*, and *Rokubacteria* the most abundant. These phyla were correlated with soil biochemical

Pilihan Database ProQuest

The screenshot shows the ProQuest 'Select Databases' interface. At the top, a teal header contains the ProQuest logo and navigation icons. Below the header, a light gray bar features search options: 'Basic Search', 'Advanced Search', 'Publications', and 'Databases (3)'. The 'Databases (3)' option is circled in red and labeled with a large black '1'. The main content area is titled 'Select Databases' and includes a tip about database shortcuts. Below the tip, a teal button labeled 'Use selected databases' is circled in red and labeled with a large black '3'. Underneath the button, there are view toggle options: 'Brief view' (selected), 'Detailed view', 'View by name', and 'View by subject'. A large red rounded rectangle, labeled with a large black '2', encloses a list of three databases, each with a checked selection box and a document icon. The databases are: 'Coronavirus Research Database' (described as a free health and medical research database for COVID-19), 'Public Health Database' (described as health, medicine, journals, articles, magazines, news, reports, and dissertations), and 'Publicly Available Content Database' (designed to complement other databases by linking to full text for publicly available content).

Environmental and economic cycles are patterns that significantly and negatively affect the welfare of nations. With the ever-increasing negative environmental and economic impacts, the ability to achieve sustainability is hindered if the implications are not properly assessed in challenging geopolitical crises. The infrequent and fluctuating nature of these challenging geopolitical settings causes disregard and neglect for exploration within this issue. In this study, a comparative life cycle assessment was conducted as a method to evaluate the environmental and economic impacts of construction material flow across country boundaries. Based on the results found from the life cycle assessment, an environmental forecast and sensitivity analysis were established. Considering the State of Qatar as a case study, asphalt and bitumen, cement, limestone, sand, and steel were analyzed from gate-to-gate depending on transportation mode and distances used within both the pre-crisis and post-crisis sub-periods, comparing carbon emissions and costs. The results showed that the mode of transport plays a significant role in terms of carbon dioxide emissions as opposed to distance traveled. However, the increase in distance coupled to the majority shift from land to sea-based transport resulted

Abstract

[Undo Translation](#)

You have requested "on-the-fly" machine translation of selected content from our databases. This functionality is provided solely for your convenience and is in no way intended to replace human translation. [Show full disclaimer](#)

Siklus lingkungan dan ekonomi di bawah berbagai ketidakpastian geopolitik dapat menyebabkan pola yang tidak berkelanjutan yang secara signifikan dan negatif mempengaruhi kesejahteraan bangsa. Dengan dampak lingkungan dan ekonomi negatif yang terus meningkat, kemampuan untuk mencapai keberlanjutan terhambat jika implikasinya tidak dinilai dengan benar dalam krisis geopolitik yang menantang. Sifat yang jarang dan berfluktuasi dari pengaturan geopolitik yang menantang ini menyebabkan mengabaikan dan mengabaikan eksplorasi dalam masalah ini. Dalam penelitian ini, penilaian siklus hidup komparatif dilakukan sebagai metode untuk mengevaluasi dampak lingkungan dan ekonomi dari aliran material konstruksi di seluruh batas-batas negara. Berdasarkan hasil yang ditemukan dari penilaian siklus hidup, perkiraan lingkungan dan analisis sensitivitas ditetapkan. Mengingat Negara Bagian Qatar sebagai studi kasus, aspal dan aspal, semen, batu kapur, pasir, dan baja dianalisis dari gerbang ke gerbang tergantung pada mode transportasi dan jarak yang digunakan dalam sub-periode pra-krisis dan pasca krisis, membandingkan emisi karbon dan biaya. Hasilnya menunjukkan bahwa moda transportasi memainkan peran penting dalam hal emisi karbon dioksida yang bertentangan dengan jarak tempuh. Namun, peningkatan jarak ditambah dengan pergeseran mayoritas dari darat ke transportasi berbasis laut mengakibatkan peningkatan keseluruhan emisi karbon dan biaya pasca krisis. Selain itu, analisis penilaian dampak lingkungan dan ekonomi menggunakan rata-rata_{CO2} setara (CO₂-e) per kilogram dan harga satuan dari lima bahan konstruksi primer telah menunjukkan peningkatan potensial penggunaan global (GWP) yang signifikan, 1000% setelah krisis, ditambah dengan peningkatan biaya keseluruhan. Penilaian terhadap dampak lingkungan dan ekonomi selama ketidakpastian geopolitik memungkinkan kemampuan signifikan untuk mewujudkan langkah-langkah berkelanjutan untuk mengurangi degradasi ekonomi dan lingkungan secara signifikan.

[What is ProQuest Platform?](#)[What's New?](#)[Basic Search](#)[Advanced Search](#)[Working with your results](#)[Surfacing ebooks and video content](#)[Learning Tools Interoperability \(LTI\)](#)[Professional Development for Faculty and Librarians](#)[Administrator Resources](#)[Support Center Articles](#)

The **ProQuest platform** makes hundreds of full text and A&I (Abstracts & Indexes) collections available to researchers around the world. The **ProQuest Platform** hosts multidisciplinary content containing scholarly journals, books, video & audio, dissertations & theses, newspapers and more. More on the [Content](#) page.

In addition, researchers will benefit from robust information management and workflow tools and functionality integrated into the platform, like the ability to cite results in numerous citation styles, save as a PDF or other document formats, save searches, and export documents to reference management tools like RefWorks.

Content discovery is an integral part of the ProQuest platform's goal of driving better research outcomes for subscribing organizations and their users. An organization's ProQuest content is discoverable through Summon and Ex Libris Primo Central. You can also link to ProQuest from Google Scholar and PubMed. When available, researchers can find and use their organization's ProQuest ebook holdings alongside their ProQuest platform database content. Similarly, Academic Video Online (AVON) subscribers can also now discover and use their video content while searching the ProQuest platform databases or even selecting to search AVON on its own within the ProQuest platform. For more information, visit the [Surfacing ebooks and video content on the ProQuest Platform](#), [Administrator Resources](#) and [Support Center Articles](#) sections below.

ABSTRACT

Radiolabel-based imaging of molecular therapeutic targets might facilitate stratifying patients for specific biotherapeutics. New type of imaging probes, based on designed ankyrin repeat proteins (DARPin), have demonstrated excellent contrast of imaging of human epidermal growth factor type 2 (HER2) expression in preclinical models. We hypothesized that labeling approaches, which result in lipophilic radiometabolites (non-residualizing labels), would provide the best imaging contrast for DARPins that internalize slowly after binding to cancer cells. The hypothesis was tested using DARPin Ec1 that binds to epithelial cell adhesion molecule (EpCAM). EpCAM is a promising therapeutic target. Ec1 was labeled with ¹²⁵I using two methods to obtain the non-residualizing labels, while residualizing labels were obtained by labeling it with ⁹⁰Y. All labeled Ec1 variants preserved target specificity and picomolar binding affinity to EpCAM-expressing pancreatic adenocarcinoma BxPC-3 cells. In murine models, all the variants provided similar tumor uptake. However, ¹²⁵I-PB-H₂-Ec1 had noticeably lower retention in normal tissues, which provided appreciably higher tumor-to-organ ratios. Furthermore, ¹²⁵I-PB-H₂-Ec1 demonstrated the highest imaging contrast in preclinical models than any other EpCAM imaging agent tested so far. In conclusion, DARPin Ec1 in combination with a non-residualizing label is a promising probe for imaging EpCAM expression a few hours after injection.
