

BAB V

KESIMPULAN DAN SARAN

5.1. Kesimpulan

1. Penambahan konsentrasi kalsium laktat berpengaruh nyata terhadap sifat fisikokimia *rice paper* yang meliputi kadar air, daya rehidrasi dan α_w .
2. Penambahan konsentrasi kalsium laktat dalam pembuatan *rice paper* menurunkan kadar air (12,06%-13,63%), α_w (0,69-0,75) dan meningkatkan daya rehidrasi (128,32%-223,38%).
3. Perlakuan Ca-laktat 2,5% (^b/_b) paling tepat untuk mendapatkan *rice paper* yang baik dengan nilai α_w terendah 0,69, kadar air 12,63%, daya rehidrasi 186,22%

5.2. Saran

- Produk *rice paper* dengan penambahan kalsium laktat memiliki karakteristik yang kaku dan masih kurang elastis, sehingga perlu dilakukan bahan tambahan lain seperti *plastizicer* untuk mengurangi kerapuhan dan meningkatkan fleksibilitas *rice paper*. Selain itu perlu dilakukan pengujian-pengujian lain berkaitan dengan karakteristik dan daya terima konsumen terhadap produk *rice paper*.
- Penambahan kalsium laktat pada produk berbasis beras seperti *rice paper* ini dapat digunakan sebagai alternatif fortifikasi kalsium pada beras akan tetapi perlu dilakukan penelitian lebih lanjut.
