

Bab 6

SIMPULAN DAN SARAN

6.1. Simpulan

- Berdasarkan hasil penelitian dan pembahasan, maka dapat disimpulkan bahwa:
- a. Mayoritas responden (79,7%) mengetahui bahaya penggunaan piranti dengar bagi kesehatan pendengaran.
 - b. Mayoritas responden (81,7%) memiliki sikap yang peduli terhadap bahaya penggunaan piranti dengar bagi kesehatan pendengaran.
 - c. Mayoritas responden (62,7%) berperilaku sesuai dengan batas normal penggunaan piranti dengar.

6.2. Saran

6.2.1. Bagi Institusi Pendidikan Tingkat Sekolah Menengah Pertama

Penyampaian bahaya penggunaan piranti dengar secara lebih rinci, terutama bahaya kebiasaan menambah volume piranti dengar ketika situasi ramai dan dampak kerusakan pendengaran yang berpotensi menetap atau permanen.

6.2.2. Bagi Masyarakat

Melakukan pemeriksaan audiometri secara berkala untuk mengetahui kondisi pendengaran dan mencegah keparahan terjadinya gangguan pendengaran bagi mereka yang berisiko memiliki gangguan pendengaran.

6.2.3. Bagi Peneliti Selanjutnya

Perlu dilakukan pemeriksaan audiometri untuk mengetahui secara pasti kondisi pendengaran responden. Penelitian analitik tentang hubungan antara remaja dengan gangguan pendengaran akibat piranti dengar dan ada/tidak perbedaan pengetahuan, sikap dan perilaku yang bermakna antara laki-laki dan perempuan ketika menggunakan piranti dengar.
