companies surveyed is the cost strategy, followed by quality strategy, delivery strategy and flexibility strategy. There is a significant relationship between strategy and manufacturing performance and the fact that the right strategy can improve the performance of an organization. The research also found that Indonesian manufacturing firms that implement flexibility and delivery strategies can achieve better performance (financial and manufacturing) than the other two strategies. This shows the tendency that manufacturing companies that implement flexibility and delivery strategies have greater competitiveness.

The findings of this study support the fact that manufacturing strategies developed in the west or developed countries can be practiced by companies in developing countries such as Indonesia. The findings of this study also imply that accuracy in aligning strategies and environments is necessary to maximize the achievement of company performance. From the perspective of manufacturing companies in Indonesia, manufacturing strategies are needed in (1) responding to the business strategies implemented and achieving the objectives of the company (2) identifying and addressing existing weaknesses or harnessing the company's strengths (3) accommodating environmental changes and changing market demands (4) gaining unique competencies that currently do not yet have (5) making the manufacturing function stronger, and (6) achieving the goal of optimizing company performance. Some possible limitations of this study are the number of companies involved is still considered very limited so it needs to be considered in the generalization of the adoption of research models. In addition, data on manufacturing and environmental strategies are perceptual data obtained from the CEO's manufacturing firms, which still need to be confirmed to the relevant parties directly involved in the company's manufacturing activities.

saja tetapi orang tua kedua belah pihak, saudara-saudaranya bahkan keluarga mereka masing-masing.

Perkawinan menurut UU No. 1 Tahun 1974 pasal 1 perkawinan adalah ikatan lahir batin antara seorang pria dan wanita sebagai suami istri dengan tujuan membentuk keluarga (rumah tangga) yang bahagia dan kekal berdasarkan Ketuhanan Yang Maha Esa, (Jamali. A, 2006)

Diori (2005) mengemukakan bahwa “pernikahan dini merupakan sebuah perkawinan dibawah umur yang target persiapannya belum dikatakan maksimal seperti persiapan fisik, persiapan mental dan juga persiapan materi, karena inilah pernikahan dini bisa dikatakan sebagai pernikahan yang terburuburu, sebab segalanya belum dipersiapkan secara matang”.

Adapun beberapa faktor yang mendorong tejadinya penikahan dini di lingkungan masyarakat yaitu:

Faktor ekonomi, berdasarkan BKKBN (1993:9) beban ekonomi pada keluarga sering kali mendorong orang tua untuk cepat menikahkan anaknya dengan harapan beban ekonomi keluarga akan berkurang, karena anak perempuannya sudah menikah dan menjadi tanggung jawab suami. Hal ini

**PENGARUH**

**PENDAHULUAN**

Tulisan merupakan proses yang berlangsung secara alamiah, dimulai sejak lahir dan pada akhirnya diakhiri pada semua makhluk hidup (Nugroho, 2008). Penyakit degeneratif pada lansia yang disebabkan oleh penurunan fungsi adalah diabetes mellitus dan hipertensi (Sobroto, 2006). Penyakit tersebut akan dapat mengganggu aktivitas lansia dalam memenuhi kebutuhan sehari-hari (Sutikno, 2011).

Indonesia termasuk 10 besar negara dengan jumlah penderita DM terbanyak. Pada tahun 2000 jumlahnya 8.426.000 orang, dan WHO memprediksi pada tahun 2030 jumlah ini akan meningkat menjadi 21.257.000 orang (WHO, 2012). Berdasarkan data Riset Kesehatan Orang Tua Tahun 2007 menjelaskan prevalensi diabetes pada kelompok populasi lanjut usia di negara-negara miskin meningkat dengan bertambah panjangnya usia penduduk. Prevalensi diabetes mellitus di provinsi Jawa Timur sebesar 1%. Menurut laporan World Health Organization (WHO) bahwa terdapat 1,5 juta penduduk mengalami keramatan akibat diabetes dengan prevalensi sekitar 2,7%. Dari seluruh keramatan akibat DM di dunia, 70 % keramatan terjadi di negara-negara berkembang termasuk Indonesia (WHO, 2014).

Diabetes Mellitus (DM) pada periori terjadi karena tubuhnya resisten insulin pada usia lanjut yang disebabkan oleh faktor, yaitu pertama adanya perubahan komposit tubuh, komposit tubuh berubah menjadi air 33%, sel solid 12%, lemak 30%, sedangkan tifat dan mineral kurang 15% sehingga tinggi 3%. Faktor yang kedua adalah turunnya aktivitas fisik yang akan mengakibatkan penurunan jumlah respiro insulin yang siap berikan dengan insulin sehingga kecepatan transkripsi GLUT-4 (glucosetransporter-4) juga menurun. Faktor ketiga adalah perubahan pola makan pada usia lanjut yang disebabkan oleh berkeringnya gigi pelgi sehingga persentase bahan makanan karbohidrat akan meningkat. Faktor keempat adalah perubahan neurohormonal, khususnya Insulin Like Growth Factor-I (IGF-I) dan dehydroepiandrosterone (DHEAS) (Rochmah, 2006).

Hiperlipidemia pada seniors kaus disebabkan oleh defisiensi fungsi insulin kerja insulin. Defisiensi efek insulin dapat disebabkan oleh penurunan sekresi insulin oleh sel p pancreas, penurunan respon terhadap insulin oleh jaringan sasaran (resistensi insulin), atau peningkatan hormon counterregulatory yang melawan efek insulin (McPhee & Ganong, 2010). Komplikasi dari DM yakni hipoglikemik, dislipidemik, kardiovaskular, sindrom hiperglikemik hiperomolar nonketotik (Semelitz & Bare, 2012). Berdasarkan hasil penelitian Rosyada & Trihardini (2013) tentang komplikasi DM pada Lansia didapatkan hasil bahwa jumlah lansia

pernikahan semua umur. Kedewasaan seseorang di dalam hukum adat diukur dengan tanda fisik apabila anak perempuan sudah *haid* (datang bulan), buah dada yang menonjol sudah dianggap dewasa. Bagi anak laki-laki ukurannya hanya dilihat dari perubahan suara, fisik sudah mengeluarkan air mani atau sudah mempunyai nafsu seks.

Faktor perjodohan, menurut Wigyodipuro (1967:133) pernikahan dini sering terjadi karena sejak kecil anak telah dijodohkan oleh orang tuanya. Dengan melakukan pernikahan dini untuk segera merealisir ikatan hubungan kekeluargaan antara kerabat pria dan kerabat wanita yang telah lama mereka inginkan bersama supaya hubungan kekeluargaan mereka tidak putus. Menurut BKKBN (1993:9) adanya kekhawatiran orang tua terhadap anak

## 2.4 Substansi Artikel

### f. Nisbah Sumber Acuan Primer Berbanding Sumber Lainnya

Nisbah jumlah sumber pustaka primer berbanding jumlah sumber lainnya menentukan bobot pemikiran dan gagasan yang dijadikan kerangka penulisan. Makin banyak jumlah pustaka primer yang diacu, makin bermutu pula tulisannya.

### g. Derajat Kemutakhiran Pustaka Acuan

Derajat kemutakhiran bahan yang diacu dengan melihat proporsi terbitan 10 tahun terakhir (kecuali bidang-bidang tertentu yang tidak banyak pembaharuan seperti hukum, taksonomi, dan arkeologi) merupakan tolok ukur mutu terbitan berkala ilmiah yang penting. Karya klasik yang relevan dapat diacu sebagai sumber masalah tetapi tidak untuk pembandingan pembahasan. Pengacuan pada tulisan sendiri (*self citation*) yang terlalu banyak dapat mengurangi nilai terbitan berkala ilmiah.

# Alasan Penggunaan: Reference Manager

## 2.5 Gaya Penulisan

### h. Penyusunan Daftar Pustaka

Penyusunan daftar pustaka yang mengikuti salah satu teknik yang standar harus dilakukan secara baku dan konsisten. Untuk menjaga konsistensi cara pengacuan, pengutipan dan penulisan daftar pustaka, sebaiknya menggunakan aplikasi untuk mengelola pengacuan dan daftar pustaka tersebut, sebagai contoh aplikasi yang gratis (misalnya *Mendeley*, *Refworks*, *Zotero*) atau aplikasi yang berbayar (misalnya *Endnote*, *Reference Manager*).

# Alasan Penggunaan: Reference Manager

## Reasons to choose Zotero:

Your research content is diverse: It is the easiest method to gather citation records for non-PDF and PDF content. Zotero's single-click capture works with more databases, catalogs, and websites than Mendeley's Web Importer. You can also [enable the retrieval of PDF metadata](#), which allows you to create citation records just from dragging a PDF into Zotero. Zotero is open source and cannot be acquired by a company.

## Reasons to choose Mendeley:

Your research content is primarily contained in PDF files: Mendeley has an integrated PDF viewer and can create citation records just from importing a PDF file. Mendeley.org has the strongest website and community platform.

## Reasons to choose EndNote:

Zotero and Mendeley are relatively young tools when compared to EndNote. EndNote X6 offers some advanced features that might be necessary for your discipline and work flow. However EndNote X6 is not free and can be purchased with an educational discount through the Washington University Campus Store or E-Academy.

**New Horizons: From Research Paper to Pluto**

**Tavner P**  
2015

NASA's New Horizons mission, part of the New Frontiers Program, is expected to reach its primary target - the dwarf planet Pluto - on July 14 2015. Mendeley was invited to visit NASA during the close approach of Pluto and will be at NASA HQ on the day of the encounter. This report was written to mark the occasion and to share our excitement at being present for the event.

**Abstract:**  
Institutional repositories represent extremely innovative technology, but repository managers still struggle to bring together a critical mass of content and to demonstrate their overall impact on research. In this paper I propose a set of Performance Indicators (PIs) to assess institutional repositories' success. Fourteen internal indicators are selected and inserted in the quadruple 'balanced scorecard' perspective. Three more indicators from an external perspective are then proposed and discussed b...
