Acknowledgement

First of all, I would like to offer my praise and gratitude to Gusti Allah SWT for the blessing and guidance during my study.

There are many valuable contributions, advices, and guidance I have received from the committee of MPBI Program at Widya Mandala Catholic University Surabaya to whom I address my deepest gratitude: Dr. Ignatius Harjanto, my thesis advisor whose extraordinary patience and wisdom have enabled me to accomplish the thesis; Dr. Hendra Tedjasuksmana, M. Hum. as the Head of English Education Department. His very helpful hands have pulled me back on the right track; Prof. Anita Lie, ED. D. and Prof. A. Ngadiman as the thesis examiners. Their valuable insights have clarified and enriched my understanding; all leturers of MPBI who have extended my knowledge and skills and have inspired me to be a better teacher: Prof. Wuri Soedjatmiko, Dr. Vincentius Luluk Prijambodo, Siti Mina Tamah, Ph.D, Takim Andriono, Ph.D, Y. G. Harto Pramono, Ph. D, and Prof. E. Sadtono; and all the staff officers of MPBI Program who are always helpful during my study.

I would also extend my gratitude for my beloved family (my wife Zu and my kiddos El, Daya, and Ara) and my parents for their prayer and support.

I would also express my gratitude to my friends from MPBI-19: Fela, Sisca, Pristi, Mas Anton, Martin, Bu Dian, Pak Yos, Iffah, Pak Eman, Pak Stanis, Bekka, Elizabeth, Grace, Alyn, Mei, Seto, and Yuni. Thank you for the togetherness and beautiful moments we have shared during our study.

Abstract

Language teacher education such as MPBI Program of Widya Mandala Catholic University Surabaya is assumed to give positive impacts on its alumni's mastery in term of academic of classroom competencies, pedagogical competences, and the 21st century skills which directly or indirectly also contribute to their career advancement. However, a study which proves the assumption is yet to conduct.

This study was conducted to investigate whether MPBI Program contributes to its alumni's career advancement. 6 alumni of MPBI Program who work as teachers in various levels of education were chosen as the participants. They graduated between the years 2010-2018. The data was gathered by using questionnaires and conducting interviews. The supervisors of the participants were interviewed to confirm the data for triangulation. Using Kirkpatrick's level 3 and 4 evaluations, this study investigated the quality of and the extent the participants apply the pedagogical competencies and the 21st Century skills related to their career advancement after their participation in MPBI Program. Using Actor-Network-Theory, the study investigated the courses, teaching learning activities, human entities, and non-human entities of MPBI Program which contribute the most to the alumni's career advancement. The network which shows the translation process among the courses, teaching learning activities, human entities, and non-human entities of MPBI Program which then shows the extent MPBI Program contributes to the participants' career advancement was drawn.

The study revealed that the quality of and the extent the participants apply the pedagogical competencies and the 21st

Century skills mostly improve after their participation in MPBI. The improvement and application of the competences and skills affect their career advancement. They get better job or chair structural position in their work. Teaching English Skills, Qualitative and Quantitative Research Methodology, and Workshop Training are the courses considered as the actors which contribute the most to the participants' career advancement whilst the interaction with classmates while doing group homework, interaction with lecturers during teaching learning activities, and interaction with lecturers outside the classroom are the teaching learning activities considered as the actors that contribute the most to the participants' career advancement. Among the human entities, lecturers and classmates are the actors that contribute the most to the participants' career advancement whilst teaching media, internet connection, and textbook are the non-human entities considered as the actors that contribute the most to the participants' career advancement. Interaction between the lecturers and students outside the classroom should be taken into consideration since it promotes values that become the signature of the students when they are back to their work. A study investigating how the promoted values contribute to the alumni's career advancement is suggested to be conducted.

Keywords: Actor-Network-Theory, educational program, human entity, non-human entity, curriculum, career advancement, the 21st Century skills, program evaluation.
