

## **BAB V**

### **KESIMPULAN DAN SARAN**

#### **5.1. Kesimpulan**

1. Penambahan maltodekstrin berpengaruh pada sifat fisikokimia tepung *pericarp* manggis yaitu kadar air, aktivitas air, warna, dan total fenol.
2. Kadar air tepung *pericarp* manggis yang dihasilkan berkisar 3,06 – 5,12% (*wet basis*), sedangkan aktivitas air berkisar 0,332 – 0,475
3. Uji warna tepung *pericarp* manggis menghasilkan nilai *lightness* antara 63,6-65,4; *chroma* antara 15,8-17,4; *°hue* antara 49,2-49,7.
4. Total fenol tepung *pericarp* manggis berkisar antara 3789,33 – 4829,33 mg GAE/ kg bahan
5. Perlakuan terbaik adalah penambahan maltodekstrin sebanyak 18% (b/b) dengan hasil uji total fenol tertinggi yaitu 4829,33 mg GAE/ kg bahan

#### **5.2. Saran**

Perlu dilakukan penelitian lebih lanjut untuk mempertahankan warna merah keunguan dari *pericarp* manggis pada proses pengolahan tepung *pericarp* manggis.
