

Kesimpulan

Proses pembuatan SCC tipe *analogue cheese* parsial *dairy* dilakukan dengan proses utama hidrogenasi parsial pada suhu 170°C dan tekanan 11 bar menggunakan katalis Ni/Al menghasilkan *hardened coconut oil* dengan stabilitas tinggi dan kemudian dicampurkan dengan bahan-bahan pendukung lainnya untuk memberikan karakteristik dan tampilan fisik SCC yang diinginkan. SCC yang dihasilkan memiliki karakteristik berupa kaya mineral dan vitamin, stabilitas rasa yang baik dengan masa simpan yang panjang.
