APPROVAL SHEET

(1)

This thesis entitled “The Effect of the Total Physical Response Method and Translation Method on the Vocabulary Achievement of First Graders at Sekolah Citra Berkat Surabaya” prepared and submitted by Anneke Ongkowidjojo has been approved and accepted as partial fulfillment of the requirements for the Sarjana Pendidikan Degree in English Department Faculty of Teacher Training and Pedagogy by the following advisors:

M. G. Retno Palupi, M. Pd.
First Advisor

Dra. Ruruh Mindari, M.Pd.
Second Advisor

APPROVAL SHEET

(2)

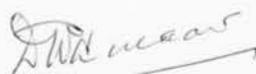

This thesis has been examined by the committee on an oral examination
with the grade of _____ on January 12, 2008.

Dr. Tjahjaning Tingastuti S., M.Pd.
Chairperson

Dra. M.N. Siti Mina Tamah, M.Pd.
Secretary

Prof. Dr. D. Wagiman A., M.A.
Member

M. G. Retno Rahupi, M. Pd.
First Advisor

Dra. Ruruh Mindari, M.Pd.
Second Advisor

Approved by:

Dra. Agnes Santi Widiyanti, M.Pd.
Dean of the Faculty of Teaching
Training and Education

Dra. Susana Teopilus, M.Pd.
Head of the English Department

ACKNOWLEDGEMENTS

First of all, the writer would like to thank God for His love, blessings and help in her study especially during the preparation and examination of this thesis. Only by His grace the writer is able to finish this thesis.

She would like to express her deepest appreciation and gratitude to:

1. M. G. Retno Palupi, M. Pd., the writer's first advisor, who has been willing to devote her valuable time to guide and give her advice and suggestions and all kinds of support to her in finishing this thesis.
2. Dra. Ruruh Mindari, M. Pd., the writer's second advisor, who also gives her valuable time, guidance, suggestions, and all kinds of support during her doctoral study for completing this thesis.
3. All the lecturers of English Department of Widya Mandala Catholic University who have taught her during her study in this university.
4. Drs. Dwi Sunu W. Pebrunto, M. Ed., head of curriculum at Sekolah Citra Berkart, who always shares his knowledge and guides the writer in doing this thesis.
5. Tri Endang Sulistyowati, S. Pd., Principal of SD Citra Berkart Surabaya, who gives permission to conduct the experiment in her school and also always supports the writer in finishing this thesis.
6. Maria Josephine K., S.Pd. who encourages the writer in finishing this thesis.

7. The librarians of Widya Mandala Catholic University who have been so cooperative and helpful in providing her with a number of important books and references.
8. First graders of Sekolah Citra Berkat who have been so cooperative and helpful in providing her with the data by joining the activities.
9. The writer's family who has supported and encouraged her finishing her thesis.
10. The writer's friends and colleagues wherever they are who have given supports and prayer in finishing this thesis.

Finally, the writer's sincere gratitude is also due to some other people whom she cannot mention one by one, who have provided her with support, encouragement and everything necessary during the process of writing this thesis. The writer admits that this thesis is still far from perfection. She believes that reader's criticism and suggestions will somehow make it better.

The writer

ABSTRACT

Ongkowitzjojo, Anneke. 2007. *The Effect Of The Total Physical Response Method And Translation Method On The Vocabulary Achievement Of First Grade Students Of Sekolah Citra Berkat*. Thesis. Teaching Training and Pedagogy Faculty. FKIP. Universitas Katolik Widya Mandala Surabaya. Advisors: M. G. Retno Palupi, M. Pd. and Dra. Ruruh Mindari, M. Pd.

Key words: Effect, Total Physical Response, Method, Vocabulary

Teaching English vocabulary is important as vocabulary mastery will determine how young learners express their thoughts and ideas through writing and speaking and also their ability to understand what they read and hear. As young learners enjoy creating fun in whatever they do are motivating their learning, this study suggested the use of Total Physical Response Method. As in the Total Physical Response Method, young learners learn the language through hearing, seeing and doing it.

An experimental study was then conducted to see the difference of the vocabulary achievement between the students taught with gestures in the Total Physical Response Method and those taught with words list in the Translation Method. The study was conducted at Sekolah Dasar Citra Berkat. The sample was first graders.

The data were computed by applying t-test formula. The result of the t-test indicated that the vocabulary achievement of the experimental group is not significantly different from that of the control group as some possible factors affected such as numbers of students and low reliability of the instrument used. Those factors affected the result of the t-test as the result was insignificantly difference.

As a conclusion, the result of the study is not significantly different. However, it does not mean that the Total Physical Response Method does not give positive effect as some students of the experimental group get better score at the post-test and the teaching learning activities became more relaxing than before.
