

## **BAB 5**

### **KESIMPULAN DAN SARAN**

#### **5.1      Kesimpulan**

Berdasarkan dari *literature review* pada 11 artikel ilmiah terkait efektivitas dan keamanan penggunaan kombinasi tenofovir disoproxil fumarate (TDF) pada pasien HIV- AIDS yang dilaksanakan mulai dari bulan Oktober 2021 – November 2021 dapat disimpulkan bahwa:

Penggunaan tenofovir disoproxil fumarate efektif digunakan untuk penekanan virus berkelanjutan untuk orang dewasa atau untuk odha yang akan memulai terapi ARV, dan dapat ditoleransi dengan baik. Efek samping yang perlu diwaspadai selama penggunaan regimen terapi tenofovir disoproxil fumarate adalah gangguan gastrointestinal yang berupa mual, muntah, diare, serta kemungkinan adanya gangguan ginjal, dan kepadatan tulang.

#### **5.2      Saran**

1. Perlu dilaksanakan penelitian lebih lanjut untuk mengetahui faktor resiko yang dapat memicu gangguan gastrointestinal, ginjal dan kepadatan tulang. Informasi tersebut dapat menjadi bekal penting bagi Dokter dan Farmasi dalam monitoring terapi tenofovir disoproxil fumarate.
2. Perlu dilaksanakan kajian *literature* dengan memperluas database yang digunakan sehingga artikel ilmiah yang digunakan dapat semakin banyak.
3. Perlu dilaksanakan meta analisa untuk melihat signifikansi hasil dari beberapa penelitian dengan karakteristik maupun luaran hasil yang sama untuk mendapatkan kesimpulan lebih objektif mengenai profil efektivitas dan keamanan penggunaan tenofovir disoproxil fumarate.
