ACKNOWLEDGEMENTS

ACKNOWLEDGMENTS

Firstly and above all the developer would like to show her deepest gratitude to Allah SWT for the everlasting blessings poured on her during her study especially her thesis writing process, for all the guidance that have always been given to her even when she was far away from Him, for the answers of all of her cries, desperation, dreams, wishes, and struggles, and for His unconditional love to her and her family.

The developer would also like to express her appreciation and gratitude to her thesis advisor, Y.G. Harto Pramono, Ph.D for his patience, understanding, and encouragement during the thesis consultations and writing. She also thanks him for “teaching” her not only about the thesis matters but also about the spirits to learn many new things for her future career.

For Prof. Dr. Wuri Soedjatmiko, who is not only the lecturer during her study in Widya Mandala but also her life advisor, the developer would like to appreciate and thank her for always being the great supporter for her and for being “the-never-give-up” inspirations that has inspired the developer deeply. Her encouragement, love, trust, and attention will never be forgotten.

This acknowledgement will not be complete without the tribute to Prof. E. Sadtono, Ph.D in which the developer is indebted the patience, nurturing, understanding, and his “listening ears”.

This thesis would have never been completed without the everlasting encouragement, support, patience, trust and prayers from the developer’s beloved

family and close friends. She especially would like to express her deepest gratitude and love to her mother for her life-long prayers to her daughter and to her late father who left her family just two months before the developer announced the good news to continue her study. For her sisters and brothers who are always in her side during her ups and downs. This gratitude is also forwarded to the best friend of the developer who always trusts her and believes that she will always be able to make her dreams come true.

The developer would also thank the management of STIKOM, all the friends, colleagues, coworkers, and the people who have helped the developer, she cannot say anything but thousands of thanks. She apologizes for not being able to mention each of their names, yet she always remembers and puts them in the bottom of her heart.
