## ACKNOWLEDGEMENTS

Realizing that one will always depend on her Creator, the writer, first of all, would like to thank to God for his Grace and Blessing so that she could accomplish writing this thesis in due time.

The writer would like to express her deepest gratitude and her indebted feeling to DR. A. Ngadiman, Mpd., her first advisor and Drs. Sabardi, Mpd., her second advisor, who have helped the writer finish her writing by giving their inspiration, suggestion, advise, guidance, encouragement, and their supernal patience.

The writer wants to her parents and families who have supported her to finish her study by giving money, attention, and advise.

The writer wishes to thank all lecturers of the English Department of Widya Mandala University Surabaya, who have taught her academic years so that she can finish her study at this university.

The writer also wishes to thank Ir. Melani Satyoadi as the leader of the computer laboratory in Widya Mandala University who allows her to use the computer in her laboratory to type this thesis.

Besides that, the writer would like to express her gratitude to Yakob Utomo Y., Tikno Rahardjo, and Tjiong Cie Jin as the assistants in the computer

laboratory in Widya Mandala University who have helped the writer when the writer finds any difficulties to types her thesis.

A word of thanks is also due to all those contributed to this thesis either directly or indirectly; for their books, supporting and even their valuable time.

## ABSTRACT

Based on the 1994 curriculum, there are three package programs for senior high school students in Indonesia, namely: language package program, mathematical and natural science package program, and social studies package program. This thesis deals with the second package program, mathematical and natural science, especially with its English subject.

Through observation and interviews, it is known that there is no English teaching materials for the mathematical and natural science package program that really meets the students' needs. Even if there is, the materials are more suitable for the social studies package program, especially the reading passages.

Knowing how important reading materials for English teaching and learning activities, the principal aim of the English teaching in Indonesia is to make students able to read books in English. The writer would like to suggest reading materials that are considered more suitable for the mathematical and natural science package program. The suggested reading materials include the reading passages and reading exercises.

Books and articles related to the present study have been the first aid used by the writer in conducting this study. After gathering, summarizing and expressing the relevant facts and opinions from these sources, she suggests her own opinion concerning materials to develop the reading skill of SMU IPA. Then the writer collects materials and designs the exercises related to the passages.
